Claims 1-20 are pending.

Ex Parte Quayle

1. This application is in condition for allowance except for the following formal matters:

Drawings

- a. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character “305” has been used to designate two separately designated “Thermally Expansive Layer”. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

- b. The disclosure is objected to because of the following informality: (a) reference to paragraph [0059] refers to one “Thermally Expansive Layer” 305, however, it is not clear if there actually is two separate thermally expansive layers as shown in FIG. 8. Appropriate correction is required.

Art Unit: 2627

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance. The prior art of record does not teach nor reasonably suggest a read/write head (claim 1); a write element (claim 9); nor a disk drive (claim 14) which includes the claimed features including at least "a layer of thermally expansive material formed over the insulation layer, and recessed from the air bearing surface, that expands in response to heat absorption, causing a rotational moment of force that counteracts the protrusion force thus reducing the pole tip protrusion." as required by all the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian E. Miller whose telephone number is (571) 272-7578. The examiner can normally be reached on M-TH 6:30am-4:00pm.
